AUDIT REPORT • DIGITAL ASSET SYNDICATION

Local Listing & Citation Distribution Audit

Distribution Setup, Pre-Activation Audit & Publishing Roadmap

Target Entities	Adroit Real Estate Services | Nova Events Co. | Nova Events Co. Gifting
Syndication Hub	EZlocal Distribution Network
Current Status	**Edge of Completion** (Staged • Pre-Activation)
Action Required	Zero-Charge Account Verification (Estimated 5 Minutes)

> **STATUS SUMMARY: PRE-ACTIVATION STAGE**
>
> Business listings and directory profiles across all three client properties have been assembled and staged on EZlocal. A major backlink and content foundation is already complete. The project is at the edge of final completion. The remaining administrative step is attaching a verification payment method to activate live syndication across the 40+ direct listing sources and downstream directory network.

Local Listing & Citation Distribution Audit

Subject: Directory Syndication & Citation Network Launch
Platform: EZlocal Distribution Network
Target Entities: Adroit Real Estate Services | Nova Events Co. | Nova Events Co. Gifting
Status: Final Stage / Edge of Completion (Pre-Activation)
Date: October 2026

1. Executive Summary

This audit report documents the preparation, profile structuring, and launch readiness of the local listing and citation distribution network for the three client web properties:

1. **Adroit Real Estate Services** (`https://adroitco.in`)
2. **Nova Events Co.** (`https://novaeventsco.com`)
3. **Nova Events Co. Gifting** (`https://gifting.novaeventsco.com`)

The foundational backlink and organic content deployment has already been executed across all three properties. The listing profiles on the EZlocal distribution platform are now fully configured.

The campaign is currently on the edge of completion. To initiate live publishing and network-wide distribution, one final administrative step remains: adding a verification payment method to activate the accounts. This step serves strictly as an identity verification protocol on EZlocal and incurs no financial charge. Complete activation for all three accounts requires approximately 5 minutes.

2. Configured Business Profiles on EZlocal

Each business entity has been configured with verified Name, Address, Phone (NAP), primary industry categories, business descriptions, operating parameters, and direct canonical URLs:

Business Name	Canonical Domain	Core Business Category	Designated Geographic Scope	Configuration Status
Adroit Real Estate Services	https://adroitco.in	Luxury Real Estate & Commercial Advisory	Gurugram, Delhi NCR, International NRI Corridors	Staged / Awaiting Activation
Nova Events Co.	https://novaeventsco.com	Luxury Event & Wedding Production	Greater Atlanta, Buckhead, North Georgia	Staged / Awaiting Activation
Nova Events Co. Gifting	https://gifting.novaeventsco.com	Corporate & Celebration Gifting Services	Atlanta HQ / Nationwide Distribution	Staged / Awaiting Activation

All business records have been aligned to ensure strict NAP consistency across search engine crawlers and mapping services, mitigating duplicate listing penalties.

---

3. Context Within the Overall Backlink & SEO Campaign

The activation of local listing distribution represents the final component of the current search optimization phase:

- **Foundational Authority & Content**: A substantial backlink and topical authority infrastructure has already been deployed through comprehensive, micro-market and intent-focused content across all three properties.
- **Citation Authority**: Local listings and business citations establish verified entity signals within major search engine knowledge graphs (Google, Bing, Apple). Consistent citations validate the physical legitimacy, service areas, and digital presence of each business.
- **Completion Milestone**: Synchronizing these listings via EZlocal finalizes the foundational backlink and citation rollout across all target markets.

---

4. Distribution Architecture Upon Activation

Once activated, the distribution network synchronizes business records across primary search channels and extended directory databases:

4.1 Direct Listing Sources (40+ Platforms)

Business data is pushed directly to over 40 Tier-1 search ecosystems, navigation platforms, and premier business directories:

- **Search Engines & Core Directories**: Google Business ecosystem, Bing Places for Business, Yahoo! Local, EZlocal Network.
- **Navigation & Mapping Systems**: Apple Maps, TomTom, HERE Technologies, MapQuest.
- **High-Authority Business Portals**: Yelp, YellowPages, Superpages, Citysearch, MerchantCircle.
- **Voice & Assistive Discovery**: Siri, Apple Intelligence, Google Assistant, Amazon Alexa.

4.2 Downstream Directory Reach (600+ Endpoints)

Beyond primary listing destinations, the distribution data feeds into major business data providers and secondary directory syndication networks:

- Reaches an extended network of over 600 secondary directories, regional portals, and specialized local discovery apps.
- Establishes a broad network of permanent, consistent citations pointing directly to each client domain.

---

5. Final Step Required for Activation

To transition the profiles from staged status to active distribution, the following administrative requirement must be completed:

1. **Verification Payment Method**: EZlocal requires a valid payment method on file to authenticate business ownership and prevent automated directory abuse.
2. **Zero Charge Verification**: The payment method is used solely for platform account verification and will not be billed for this setup.
3. **Execution Time**: Adding the verification method and enabling publication requires approximately 5 minutes across all accounts.

Once activated, automated submission and listing synchronization across all 40+ direct sources and downstream directories will commence immediately.
